Product information

The Guardian series is suitable for public access areas and when treating or handling children. The unique design allows sharps to be disposed in a secure and user friendly way. The safety system provides a protection from entering the container in any way. The integrated sluice will effectively stop any hands of a child trying to access it.

Apart from the access system it also works in an aseptic way where you place all objects in the sluice without touching anything. The container will after that open itself to dispose the items and then close. This will eliminate the risk of cross infection. The container has an automatic protection against overfilling. When it has reached the maximum level the sluice no longer works which indicates that the container must be permanently closed.

Key Benefits

- Protected access - preventing coming in contact with waste
- Fall over protection – no content coming out
- Prevents overfilling – stops working when full
- Stackable both empty and full
- Tailored to box and pallet size
- Autoclavable
- Ergonomic and visually sealing for both daily use and permanent
- Manufactured in environmentally friendly PP
