Product information

The Vital series is a very flexible and innovative set of round high quality containers. They are specially designed for a safe working environment at a hospital or health care establishment. Vital are designed with extra wall thickness to prevent penetration. All sizes are stackable both empty and full. They are all equipped with universal needle disconnectors, universal blade disconnectors, QuickFit alternative, Leur lock and slip disconnectors. They are able to be locked both temporarily and permanently. The latter one is indicated by a flap with a lock showing that it is permanently locked. Vital has a visible fill line that indicates when the container is full.

All sizes are fully autoclavable and equipped with handles in order to help the transportation. The available sizes are 1,5 litres, 2,2 litres and 3,5 litres.
